TA Weekly Meeting #3

CSCI 3303: The Bookaholics

Team member #1: Oscar

- what have you done since the last meeting?
    - Beautify Home and Search Results Page
    - User can add books to their collection (added book to books database with books_to_users relation)
    - Added the review_to_books relation, as a result Cooper's 'My Reviews' page works

- what are you planning to do until the next meeting?
    - Help finish Lab 13
    - Work/Add onto write-up files such as READ.me and Project Report

- what are the challenges you are facing?
    - Backend aspects, just taking the time to implement them.

Team member #2: Yusef

- what have you done since the last meeting?
  - Add more features and customizations for every page. (style preferences + banners)
  - Create more cases and theme styles for login and registration.
  - Complete welcome page and made it more detailed and user friendly.
  - Added a feature in My Books that compute the total number of books in a collection.
  - Updated story board and readme as much as possible.
  - Start on extra credit.
  - Created successful API routes for welcome page.
- what are you planning to do until the next meeting?
  - Finish in time for extra credit.
  - Be prepared for presentation and final reports.
  - Polish anything that is causing issues.
  - Add even more features and stylistic features to the pages before the deadline.
- what are the challenges you are facing?
  - No issues.

Team member #3: Cooper

❖ What have you done since the last meeting?
  ➢ Completed myreviews page functionality
    ■ Implemented review modal, edit review modal, delete review confirmation modal
    ■ Edit review and delete review routes
    ■ Dynamic pagination dependent on number of reviews (6 per page).
    ■ Important style elements
      ● Highlight when hovering over review
      ● Next/Previous buttons disabled when no next/previous page available
      ● Scroll bar for long reviews rather than stretching the modal
      ● Page number properly highlighted on pagination bar
  ➢ Lab11 Code Test Cases
    ■ Debugged and finished lab11 test cases building off of work done by Yusef and Tristan
  ➢ Various bug fixes
❖ What are you planning to do until the next meeting?
  ➢ Finish styling on myreviews
  ➢ Combine visual and technical elements from myreviews and reviews for a more consistent look across pages.
  ➢ Code more tests aligned with UAT test plan.
  ➢ Recreate use case diagram to more accurately reflect our final product
❖ What are the challenges you are facing?
  ➢ Still encountering mime type mismatch when attempting to use included .js and .css files. Believe it has something to do with server settings but I've bypassed this by just having styling and js on the page itself.

Team member #4: Suman

- what have you done since the last meeting?
    - Implemented and tested read book, delete book and add review in my book collection
- what are you planning to do until the next meeting?
    - Focus on read reviews layout to make it symmetric and compatible with my review layout.
    - Adding new features like average rating for book and grouping all the reviews for particular book.
- what are the challenges you are facing?
    - Making reviews page look symmetric.

Team member #5: Ben

- what have you done since the last meeting?
    - Worked on the welcome screen.
    - Added logo to the navbar.
- what are you planning to do until the next meeting?
    - Help add finishing touches to the project.
- what are the challenges you are facing?
    - Not facing any challenges

Team member #6: Tristan

- what have you done since the last meeting?
  - Worked on tests and fixed a bunch of errors we were running into due to add reviews post api not having correct sql insert
  - Changed register to redirect to login screen upon successful registration
  - Fixed
- what are you planning to do until the next meeting?
  - Add otherreviews page to view other reviews for a specific book, just waiting on book title to review link
  - Add view other reviews for this book button to search results and mybooks pages
  - Get project polished and finished in time for extra credit and Lab 13
- what are the challenges you are facing?
  - Ran into an issue with one of our commits, so we had to revert a bunch of changes
  - Tried to get otherreviews to work but needed connection between book title to book review

Minutes of the Meeting

Decisions Made:

Ultimately finish all functionality of website, give website personality, add premade reviews, and make website publicly available (lab 13)

Alternative Actions/ Options Discussed:

None

Agreed-On-Roles and Responsibilities:

Each plan for the coming week from each Individual has already been shown in the next slides.
